Paper No. 78

In re application of

Ole K. Nilssen :
Serial Number: 06/787,692 :
Filed: October 15, 1985 :
For: INVERTER WITH RESONANT :
L-C CIRCUIT :

Returned herewith is the "Petition of Improper Final Rejection" filed November 1, 1990, in Patent Application 06/787,692. The Petition is returned to Petitioner under 37 CFR 1.3 for failure to conduct business with the U.S. Patent and Trademark Office with decorum and courtesy.

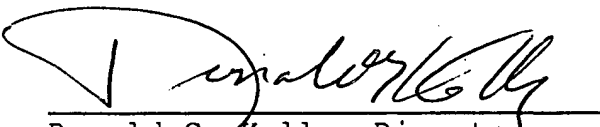

This is not the first instance of Petitioner's failure to conduct business with decorum and courtesy in this case. See, for example, the letters returning earlier papers, mailed March 26, 1986, and January 21, 1988. Note, also, that the Petitioner asked to have the return of papers on January 21, 1988, overturned by the Commissioner of Patents, and that on May 27, 1988, Deputy Assistant Commissioner for Patents James Denny affirmed that in fact language such as that presently objected to was not within the decorum required by 37 CFR 1.3.

Petitioner is advised that the subject matter disparaging the Examiner's skill (Petition, paragraph spanning pages 1 and 2) is out of place in this petition, just as it was in the earlier returned papers.

Moreover, the Petition must be limited to addressing the grounds of the petition, i.e., that the Final Rejection was premature.

Further, Petitioner is cautioned that any further such comments regarding the Examiner in this or any other application will be dealt with similarly.

The period for filing a response to the Final Rejection remains three months from the date of the Final Rejection.
